## INSTALLATION

Don't bend the fibre-optics below, the specified minimum bending radius (R).
Coaxial fibres: insert the centra fibre into the emitter hole and the peripheral fibres into the receive hole.
Use the AF5 adapter to connect thin fibre-optics $\varnothing 1 \mathrm{~mm}$. Use the AF11 cutting tool to cut the fibres to the desired length.
Cutting fibres may reduce the operating range
Always use cutting tools with the blade in perfect conditions.
